Houston's Aviation History

Houston's aviation history began in 1911, when the city's first airport was built. The airport was originally named the Houston Municipal Airport, but it was later renamed the William P. Hobby Airport in honor of the former governor of Texas. Hobby Airport served as Houston's primary airport until 1969, when it was replaced by the George Bush Intercontinental Airport (IAH). IAH is now one of the busiest airports in the United States, and it serves as a major hub for both domestic and international flights.

In addition to its major airports, Houston is also home to a number of smaller airports and aviation facilities. These facilities include the Ellington Airport, the Houston Executive Airport, and the West Houston Airport. Houston is also home to a number of aviation museums, including the Lone Star Flight Museum and the Houston Museum of Flight.

Houston's aviation industry is a major economic driver for the city. The industry employs thousands of people and generates billions of dollars in revenue each year. Houston is also home to a number of major aviation companies, including United Airlines, Continental Airlines, and Southwest Airlines.
