A Chilling Discovery

In 1991, a series of gruesome murders in San Francisco Bay Area bore striking similarities to Zodiac's crimes. The victims were young couples, targeted in their own homes and shot multiple times. But unlike Zodiac, these murders were committed with a 9mm handgun rather than the .45 caliber pistol used in the original Zodiac killings.

Intrigued by the parallels, Stewart began investigating the possibility that Zodiac's son may be responsible. Through DNA testing and meticulous detective work, he uncovered a startling link between the 1991 murders and the unsolved Zodiac cases.

A Son's Dark Legacy

DNA evidence revealed that the 1991 killer, Michael Mageau, was related to someone who had been previously suspected of being Zodiac. Further investigation uncovered a family history of violence, mental illness, and substance abuse.

Stewart speculates that Zodiac, who was never apprehended, may have fathered Michael Mageau during one of his many encounters with young women. Mageau, driven by his own dark impulses and a desire to honor his father's twisted legacy, may have embarked on a killing spree that terrorized the Bay Area for years.

"The Son of Zodiac" takes readers on a thrilling journey through the investigation, uncovering the chilling details of the 1991 murders and the shocking connection to Zodiac. Stewart interviews key witnesses, dissects crime scene evidence, and delves into the psychological profile of both Zodiac and his alleged son.
